

## Coastal Resilience, Long Island, USA

### **Coastal Resilience Project:**

The purpose of the Coastal Resilience project is to provide communities with easy access to information to assist in coastal planning, zoning, acquisition, and other management decisions regarding resources at risk from sea level rise and coastal hazards. One of the principal products of the project is a spatially explicit tool that provides forecasts of inundation on the south shore of Long Island under different sea level rise scenarios. The aim of this web mapping tool is to provide communities with easy access to information for their planning, zoning, acquisition and permitting decisions.

Category: Ecological

### **General Description:**

This dataset illustrates developed and agricultural land use types in Suffolk County, NY.

### **Source:**

*Who created the data:* Department of Commerce (DOC), National Oceanographic and Atmospheric Administration (NOAA), National Ocean Service (NOS), Coastal Services Center (CSC)

*Date and time:* 20070406

*Publisher and place:* NOAA's Ocean Service, Coastal Services Center (CSC), Charleston, SC

### **Caveats and limitations:**

See *metadata* for more information.

### **Process:**

See *metadata* for more information.
