

Coastal Resilience, Long Island, USA

Coastal Resilience Project:

The purpose of the Coastal Resilience project is to provide communities with easy access to information to assist in coastal planning, zoning, acquisition, and other management decisions regarding resources at risk from sea level rise and coastal hazards. One of the principal products of the project is a spatially explicit tool that provides forecasts of inundation on the south shore of Long Island under different sea level rise scenarios. The aim of this web mapping tool is to provide communities with easy access to information for their planning, zoning, acquisition and permitting decisions.

Category: Socioeconomic

General Description:

This dataset (2008) shows all parcels classified as ‘vacant’ by the Suffolk County, NY Real Property Tax Service Agency. These parcels can be residential, commercial, industrial, or municipal. <http://www.co.suffolk.ny.us/departments/tax.aspx>
